

FUSION COMPLIANCE MANAGEMENT

A Change Management System Designed to Keep Institutions Ahead of the Regulatory Burden

Fusion Compliance Management automates a financial institution's compliance program and provides industry-leading compliance content to support better risk-based decisions.

For over 25 years Finastra's solutions have set the industry standard for loan document compliance. With over two million loans documented in Fusion LaserPro each year, Finastra helps institutions of all sizes navigate the ever changing regulatory and supervisory landscape."

The Challenge

Compliance Managers are under pressure to manage the rising cost of compliance and monitor an increasing number of complex regulations affecting their institution. Regulators want to see proper change management systems that enable effective implementation of regulatory requirements across the institution.

Today, many institutions struggle with inconsistent, siloed and manual risk assessment processes that are costly, time consuming and increase risk exposure. Financial institutions need a solution that eases the compliance burden, saves time and reduces risk.

Why Finastra's Compliance Management System?

The Federal Financial Institutions Examination Council update to the Uniform Interagency Consumer Compliance Rating System, effective April 1, 2017, emphasizes the importance of institutions' CMS with emphasis on compliance risk management practices designed to manage consumer compliance risk, support compliance, and prevent consumer harm.

Seamless Integration with Fusion LaserPro

With Fusion Compliance Management you can now get compliance warnings to lender data analytics for automatically identifying risk trends in your portfolio so you can make better risk-based decisions and identify training opportunities.

Manage the Regulatory Burden With Fusion Compliance Management

Fusion Compliance Management assists institutions in meeting examiner expectations for board and management on:

- The oversight and commitment to your institution's CMS
- Effectiveness of the institution's change management processes
- Comprehension, identification, and management of risks arising from your institution's products, services, or activities
- Self-identification of consumer compliance issues and corrective action undertaken as issues are identified

As the industry leader in lending compliance software, Finastra developed a new solution that helps the financial institutions meet these requirements.

Key Features

- Federal and State compliance updates designed to keep the compliance team informed of legal, regulatory and compliance changes.
- A secure, password-protected database that centralizes compliance initiatives with an automated workflow including risk assessments, controls and mitigation plans, and implementation plans.
- Industry-leading and customizable risk assessment templates that provide consistent, measurable, and repeatable compliance assessments.

- Compliance checklists designed to assist in analyzing and documenting applicability of changes.
- Comprehensive risk reports with Industry Risk Comparisons for management, the board and compliance committee, auditors and regulators.
- Task management along with suggested tasks, allowing for quick identification of potential gaps in your risk mitigation and implementation planning.
- Fully auditable event logs detailing assessment process.
- Compliance Discussion Boards for your team.
- Control and Mitigation Plan Document Management.
- Customizable taxonomy for the institution's LOBs and Products.
- Automated Risk Threshold Settings for Board/Compliance Committee Oversight.
- Automated Risk Notifications.
- All backed by Finastra's in-house compliance attorneys and compliance professionals, in addition to our outside network of legal counsel representing 54 of the preeminent financial institution lending lawyers in the United States
- Training Management provides a premier knowledge assessment tool that helps financial institutions grow profitability and manage risk by measuring how well employees understand and apply changes to regulations and policy in real world scenarios.
