

The roadmap to realization

8 rules to follow for a successful core conversion

Converting to a new core is not a simple process, but it's also not an impossible one. A new core system can provide the technology cornerstone that ensures your business is set for the future, while providing a system that makes you operationally efficient, strategically positioned, and able to adapt to emerging technologies.

By following some easy rules, you can ensure that your journey to a new core system paves the way to a successful and valuable outcome.

Most existing core banking systems were built in the 1970s, so their ability to integrate with emerging technologies is restricted. Fusion Phoenix is modern and built to be future-proof. [HYPERLINK "https://www.finastra.com/solutions/retail-banking/core-retail-systems/fusion-phoenix"](https://www.finastra.com/solutions/retail-banking/core-retail-systems/fusion-phoenix) Fusion Phoenix brings together proven, real-time core processing with forward-thinking architecture that allows financial institutions to recognize advantages now and in the future. One of the only banking core systems on the market that is entirely built using Microsoft technology, it lends itself to a number of advantages including lower cost of ownership, open database architecture and improved usability.
