ENCORE®

A COMPREHENSIVE APPROACH TO SALES, SERVICE AND TRANSACTIONS
The Leader in Customer Relationship Management and Branch Automation for Financial Institutions

Encore® helps differentiate your institution from your competitors by providing a complete profile of your clients’ relationships and activities.

Differentiate Your Institution
Providing the best possible service and enhancing profitability by understanding and fulfilling your clients’ needs are vital to your business. This is becoming increasingly difficult in today’s highly competitive market. Encore® helps differentiate your institution from your competitors by providing a complete profile of your clients’ relationships and activities. The Encore Suite is a relationship-building and retention solution that provides intelligent tools for delivering customer service, processing financial transactions, presenting product options, tracking contacts and managing sales pipelines across business lines, and speeding deposit account opening. Ultimately, Encore enables financial institutions to leverage the power of the branch to strengthen relationships, improve profitability, provide better service and operate more efficiently.

Encore combines Customer Relationship Management (CRM), Teller and Sales & Service (Platform) features in one application to provide all client information and services needed by the universal banker.

Provide Better Service
The heart of Encore is its integration with legacy and third-party systems. Now anyone, anywhere in your institution, including the call center, can have access to important relationship information, service history, sales opportunities and the latest contact information. Encore provides a real-time update of the progress of the client’s request.

With Encore’s streamlined deposit account origination, an account can be opened and funded within a few minutes. Encore Work Queue and Signature and Archive features eliminate paper in the branch and expedite the client’s service requests, while tracking this activity in the client profile for a 360 degree view of the customer. You will provide a professional and timely response to your clients, increasing satisfaction and loyalty.

Business Intelligence Integration
To enhance your cross-sell efforts, Encore is integrated with Finastra’s Touché® Analyzer MCIF and Touché Messenger multi-channel direct marketing. Encore displays marketing information and household details specific to the customer, enhancing the ability to know your customer and offer products that fit their needs. Marketing messages display on demand or automatically during a teller transaction.
The Leader in Customer Relationship Management and Branch Automation for Financial Institutions

Encore enables financial institutions to leverage the power of the branch to strengthen relationships, improve profitability, provide better service and operate more efficiently.
