

## FUSION CASH MANAGEMENT

# Cash Flow Forecasting Module

Technology is a key enabler to improve and automate cash flow forecasting and view consolidated cash positions.”

Corporate treasurers require central access to information in order to quickly and accurately identify the inflows and outflows of funds, and to determine the surplus funds and liquidity available to manage working capital.

### **Timely, Accurate and Consolidated Information Facilitates Cash Flow Forecasting**

Given the growing importance of cash flow forecasting, a cash flow forecasting solution which can provide increased visibility, reduced risk, and improved availability of cash across the business will not only improve operation efficiency, reduce risk and enhance decision support but it will provide significant competitive advantage.

### **The Solution**

The cash flow forecasting module, a component of Fusion Cash Management, helps banks to ensure that information is available centrally to their corporate customers, allowing them to determine whether the inflow and outflow of funds match, to determine whether surplus is available, and to help them maximise the utilization of capital.

### **Features**

- Provides forecast views by account and currency
- Allows multiple capture modes for cash flow forecasting
- Upload and manual input supported in a range of standard formats
- Identify forecast information by type e.g. banked, contracted, etc.
- Allow forecast estimation based on probability of realization of funds
- Define repeat cycles for cash forecasting
- Support forecast transaction closure—automatic or manual or upon reconciliation

# Effective cash forecasting strengthens cash position and improves decision-making

A seamless integration of data from the payables and receivables modules into the cash flow forecasting module will increase cash flow forecasting probability, accuracy and manage the information centrally.”

## Business Benefits

### Improves Operational Efficiency With Better Cash Flow Management

Cash flow forecasting remains one of the most challenging treasury processes due to lack of visibility into the patterns of operating cash flows, difficulty in measuring accuracy for continuous improvement and coordination of internal participants. Technology is a key enabler to improve and automate cash flow forecasting and view consolidated cash positions. With the Fusion Cash Management cash flow forecasting module, a corporate treasurer is able to analyse and improve the operational process of the organization, increase cash visibility, improve accuracy of cash forecasts, monitor available liquidity, managing internal funding and reduce external borrowing.

### Reduces Risk

Without an efficient cash flow forecasting, companies cannot analyse, track, and manage risk exposures that continuously challenge treasury. Maintaining optimal levels of liquidity is crucial for ensuring the continued success of a corporation. Using Fusion Cash Management cash flow forecasting module, corporate treasurers are able to optimise their cash flow forecasting and determine surplus funds to manage liquidity risk more effectively.

### Provides Enhanced Decision Support

Effective cash forecasting strengthens the cash position and improves decision-making. A seamless integration of data from the payables and receivables modules into the cash flow forecasting module will increase cash flow forecasting probability, accuracy and manage the information centrally. Using the Fusion Cash Management cash flow forecasting module and additional components of Fusion Cash Management such as liquidity management module will help to analyse liquidity, apply liquidity management techniques to manage surplus funds and improve working capital management.

## About Finastra

Finastra unlocks the potential of people and businesses in finance, creating a platform for open innovation. Formed in 2017 by the combination of Misys and D+H, we provide the broadest portfolio of financial services software in the world today – spanning retail banking, transaction banking, lending, and treasury and capital markets. Our solutions enable customers to deploy mission critical technology on premises or in the cloud. Our scale and geographical reach means that we can serve customers effectively, regardless of their size or geographic location – from global financial institutions, to community banks and credit unions. Through our open, secure and reliable solutions, customers are empowered to accelerate growth, optimize cost, mitigate risk and continually evolve to meet the changing needs of their customers. 48 of the world's top 50 banks use Finastra technology.
