Electronic Signing Solutions—One Step Closer to Paperless

Transform the way you do business and gain the competitive edge, reduce costs and increase loan volume. As a financial institution, you exchange important documents and information with your customers and business partners every day.

Unfortunately, a significant portion of the workflow supporting this document exchange is still paper-based and susceptible to process bottlenecks. These cause delays, create compliance risks and add unnecessary costs.

A key component in getting closer to paperless is changing from the traditional “wet ink” method of signing documents to one that requires electronic signatures.

There is a clear industry trend to digitizing. Electronic signing can be integrated or used as a standalone solution to align with the devices and systems you use.

You can start sending documents to your customers quickly and painlessly—allowing you to streamline your business processes and provide your customers with a more positive and engaging user experience.

Solutions for an Evolving Economy

Escape the limitations of paper documentation with our Total Lending™ powered by LaserPro® electronic signing solutions and ensure an optimal signer experience across all channels. In those situations where you want to expand the electronic signature experience, you can select an additional eSignature capability from one of the following vendors:

- DocuSign
- eSignLive
- Black Knight

Reduce Costs from Day One

Eliminate errors and reduce the need to manually scan signed documents into your imaging system. Quickly deploy whichever solution you choose. Our signing solution works with your existing infrastructure to minimize the cost implementation. Choosing to add one of the other eSignature solutions means a simple selection within the Total Lending solution.

Loan Closing Workflow Made Simple

Incorporating eSignatures into your current loan closing process is simple. Status of the documents and signing process are made available to users and you can even set reminders for notifications. Sending documents is as easy as printing and clients retrieving those documents have a
The eSignature process is designed to gather each signer’s consent to sign the documents electronically.

- Simple two-step process. All activity related to the document workflow is tracked, providing a complete audit trail.

**Regulatory Compliance**

Regulations require lenders to send and closely track disclosures and documentation. Complying with these regulations is seamless with electronic delivery. Applicable documents and disclosures can be delivered securely, immediately and in compliance with the timeframes required by regulations.

**Signature Consent Process**

With a paperless workflow, it’s important to apply best practices to the electronic signing of documents. The eSignature process is designed to gather each signer’s consent to sign the documents electronically and allows each signer to control the application of their signature image to each signature line of each document.

**eSignature Security**

Our eSignature process follows industry-leading best practices for securing your data and transactions. Each electronic signature is unique, documentable, encrypted, and tamper-evident and complies with the federal ESIGN Act and state UETA statutes. The confidentiality of all transactions is ensured and a comprehensive audit trail is maintained for each signing event.

For those situations where documents are signed off premises or via other channels, there are a number of safeguards in place that ensure your electronic documents are safe.

Once signed, send the electronic documents directly to your imaging system—the document export capabilities are flexible enough to accommodate most imaging system vendors.

**Fast Account Opening**

Delivered with Total Lending is deposit account opening with electronic document signing capabilities. Electronic versions of the documents are signed and ready to be shared immediately with your imaging system. High volume documents like signature cards can quickly be made available across your enterprise.

**Key Features**

- Instantaneous and automatic delivery of documents using the most cost-effective channel
- Streamlined business processes.
- Secure document delivery and document encryption
- Easy fulfillment within regulatory delivery timeframes
- Automatic electronic notification of document status
- Online organization and archival of documents for future reference and collaboration
