

FUSION KONDOR
CURVES CHECKING

Improve System Performance and Profitability

Finastra Services can help you to improve the pricing quality of your front office system and ensure alignment with market best practice. ”

Fusion Kondor is the ultimate system for markets trading. With Curves Checking, we can help you improve your pricing valuation capabilities, leading to enhanced performance and improving pricing quality.

Maintaining Fusion Kondor's system performance at optimal level benefits the entire organization from the front office to the back office, and helps you achieve better pricing, which could result in better maintained capital reserves, and cash payments related to collateral agreements.

If your Yield and Volatility curves are not properly configured, this can cause discrepancies in asset pricing and the profit and loss calculations. Our experts can help you optimize the Fusion Kondor configuration to ensure you are aligned with market best practice, improving pricing and risk management across all instruments.

Approach

In a three-stage process, our expert consultants analyze your curve structure to determine instrument valuation and adherence to market best practice. This reveals whether curves need to be updated, replaced or deleted.

1. Review Stage

We analyze the system in terms of structure, instrument definition, assignment and overall usage to determine what improvements could be made

2. Business investigation

We discuss potential pricing issues with different business departments

3. Detailed analysis

Our report outlines possible problems and suggests options to improve pricing accuracy and adherence to market best practices.

Once the three-stage process is completed we will provide you with a document detailing the client environment analysis and suggested actions. You can choose to follow the suggestions independently, or we will be happy to support any changes necessary.

Finastra Services can unlock the potential of our software, leveraging best practice to reduce costs and improve client profitability.

Benefits

- Improved portfolio evaluation
- The ability to adapt to market changes such as level of liquidity or economic events
- Opportunities to trade new offshore currencies
- Avoidance of pricing discrepancies
- Compliance with regulatory requirements
- Improved Kondor performance speeds:
 - Reduce Kondor Curves Server (KCS) loads
 - Speed up batch process

The Finastra services team has several years' experience of effectively managing curves in Kondor.

We can help you find an effective solution for your potential pricing issues or help identify any problem with amendment of curves.
