

TREASURY & CAPITAL MARKETS

FUSION KONDOR

The Complete System for FX and Money Markets Trading Efficiency

Fusion Kondor is a best of breed trading system designed as an open platform that is easily customizable.”

Banks that can manage global treasury trading operations with high levels of efficiency and compliance, yet still manage risk effectively and avoid expensive system costs, have an immediate advantage over their peers.

With Fusion Kondor, financial institutions can standardize and integrate their trading and risk platform without losing sight of the demands of customers, regulators and markets. They can reduce cost per trade with true Straight-Through Processing (STP), creating complete integration from front to back office across the full range of treasury trading instruments.

Out-of-the-Box

Fusion Kondor is a best of breed trading system that enables banks to trade high volumes of treasury while offering the flexibility to support more complex derivatives, options, and structured trades. The solution comes with functionality that can be easily integrated with existing systems and applications. Fusion Kondor is designed as an open platform that is easily customizable.

Better User Experience

Fusion Kondor can be configured to meet the needs of different desks and individual traders. Flexible trade capture and deal screens, and versatile workspaces and workflows can all be set up for intuitive and efficient usability.

Global and Local Expertise

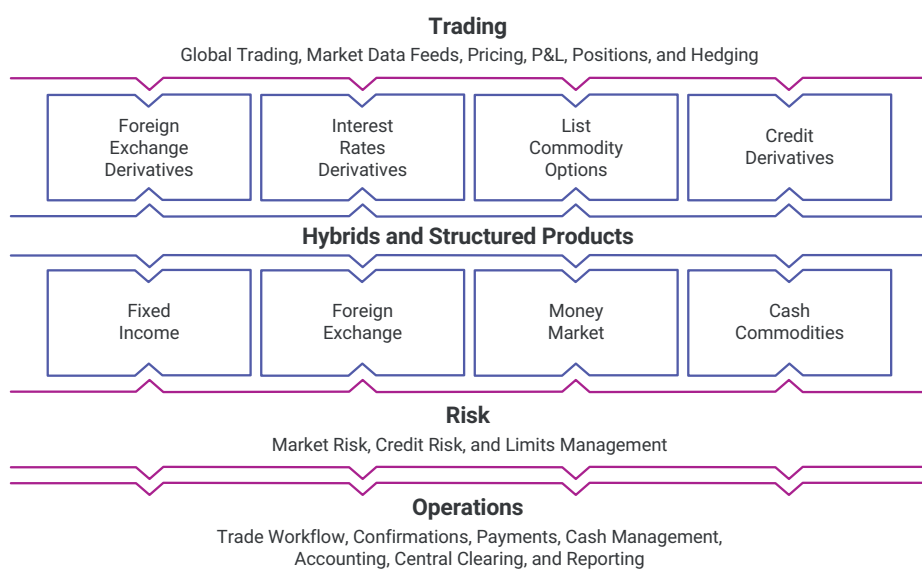

With more than 400 clients in 70 countries, Fusion Kondor is a proven and robust global system with the local expertise to meet your specific country needs. Banks seeking international growth can rely on it to support cross-border global trading. Fusion Kondor offers global book and end-of-day management, and 24/7 availability to allow for continuous trading.

Flexibility and Openness

Open integration with third-party and proprietary analytics tools come as standard with Fusion Kondor. Trades made outside the system can also be integrated into the solution's reports.

Components and Micro-Services

A range of components and micro-services integrate with Fusion Kondor to build a powerful global solution with business-wide functionality across all trading desks for both Finastra and non-Finastra systems.

Global Treasury Trading

Fusion Kondor supports 24x7, follow-the-sun global treasury trading with functional depth that includes pre-trade analytics, simulation, real-time position keeping, P&L explanation, and limits management. With extensive risk management and impressive levels of trade processing automation, the solution enables clients to reduce risk and achieve significant cost savings.

Depth of Functionality

With comprehensive coverage of interest rate derivatives, listed commodity options, and cash commodities, Fusion Kondor has been an established leader for over 25 years in treasury trading, FX, money markets, and fixed income.

Front-to-Back

Fusion Kondor includes full support for trade processing, including deal validation, margin call process, confirmation, payment, settlement, and accounting. The solution drives data consistency across the organization by enabling both the front and back offices to share the same financial libraries, for example for reference, trade and market data. The user-defined, event-based workflow streamlines back-office activities, leading to fewer failures, lower risks, and significantly reducing costs per transaction.
