

# Open innovation platform FusionFabric.cloud

## Embracing open platforms to keep pace with the evolving payments landscape

Innovation is no longer something you do occasionally to keep your stakeholders happy. For banking and finance, it is an everyday practice needed to stay relevant and sustain their business. Additionally, financial institutions are increasingly realizing that partnerships are essential to achieve transformation and steady growth in a digitally interconnected world.

### Why transformation is imperative for banks

Today's banking landscape is evolving rapidly, and traditional financial institutions are facing unprecedented challenges and opportunities. Customer expectations are undergoing a seismic shift, as consumers demand seamless digital interactions, personalized services, and real-time insights. Regulatory changes and increasing competition from fintech disruptors are additional factors that compel banks to innovate and participate in open platform solutions and fintech marketplaces.

To address these demands and drive their success, financial institutions need an innovation platform like Finastra's FusionFabric.cloud - an ecosystem designed to help banks unlock their true potential and delight customers at every touchpoint. Through our open innovation platform, financial institutions can offer value-added services such as account validation, sanction screening, fraud management solutions, and more.

### Become future-ready with FusionFabric.cloud

FusionFabric.cloud provides a marketplace for value-added services and equips banks with the tools and technologies needed to respond swiftly to market changes, embrace Open Banking, and modernize the payments business at greater speed and agility, and with lower cost and risk.

FusionFabric.cloud is pre-integrated with our payment hub solutions simplifying and de-risking the onboarding of new services which both enhance customer experience and improve operational control. For example, access to state-of-the-art real-time compliance and fraud tools allows financial institutions to mitigate risks and avoid heavy penalties and reputational damage.

FusionFabric.cloud already helps financial institutions by amplifying capabilities in areas such as:

### Payment initiation

Simplify payments with intuitive and configurable initiation tools

### Fraud management

Protect against fraud with intelligent fraud management solutions based on behavioral biometrics and ML

### AML and compliance

Ensure ongoing compliance and mitigate risk with robust AML tools

### Cross-border payments

Facilitate fast, lower cost, secure cross-border payments transparently and globally

### Corporate-to-bank-integration

Achieve simplified integration between corporate ERPs and financial institutions

# Simplified path for accelerated innovation

FusionFabric.cloud enables banks to position themselves as curators of not just financial products and services but also comprehensive experiences that extend beyond traditional banking services.

#### About Finastra

Finastra is a global provider of financial software applications and marketplaces, and launched the leading open platform for innovation, FusionFabric.cloud, in 2017. It serves institutions of all sizes, providing award-winning software solutions and services across Lending, Payments, Treasury & Capital Markets and Universal Banking (Retail, Digital and Commercial Banking) for banks to support direct banking relationships and grow through indirect channels, such as embedded finance and Banking as a Service. Its pioneering approach and commitment to open finance and collaboration is why it is trusted by over 8,000 institutions, including 45 of the world's top 50 banks.
