Conductor Guest: Transforming document workflows with precision access and seamless third-party engagement with LaserPro Conductor

Conductor Guest, a powerful extension of Finastra's LaserPro Conductor, transforms how financial institutions collaborate with third parties like attorneys, appraisers, and title companies.

By offering secure, role-based access to specific documents and transactions, it eliminates the risks of email-based sharing and fragmented workflows.

With built-in annotation tools, Microsoft Entra security, and seamless integration into existing lending processes, Conductor Guest enhances operational efficiency, reduces errors, and accelerates time to close.

Join the financial institutions modernizing their document collaboration with Conductor Guest—where trust, control, and efficiency converge.

Conductor Guest: simplifying secure collaboration in lending workflows

Simplifying collaboration with third parties without compromising security or efficiency. By replacing fragmented, email-based document sharing with a centralized, secure platform, Conductor Guest ensures that only the right people access the right documents—no more, no less.

3rd Party Access & Security: Conductor Guest eliminates the risks of email-based sharing by enabling secure, role-based access to documents through a centralized platform, accessible anywhere with internet. Built on Microsoft Azure Entra, it ensures trusted collaboration while protecting sensitive data across lending workflows.

Limit Access to Specific Documents: ensures precise control by allowing financial institutions to restrict third-party access to only the documents and transactions relevant to their role, enhancing security and reducing operational risk across lending workflows.

Collaboration Tools: enhance collaboration with intuitive tools like highlighting, comments, and watermarks, all within a dedicated guest view. Lenders maintain control while guests contribute securely, even uploading documents when needed—streamlining communication without compromising oversight.

Value for Money: Conductor Guest is included in LaserPro Cloud Premium. Institutions can also adopt it as an add-on to Conductor, unlocking new efficiencies while maximizing return on investment.

Join the institutions evolving their lending experience with Conductor Guest, embracing secure collaboration, smarter workflows, and a future-ready approach to financial services.
