

# Loan IQ Transact: Bringing automation and integration to loan servicing

Loan IQ Transact automates the processing of loan lifecycle events by allowing clients to ingest transactions from any upstream system into Loan IQ.

## What it does

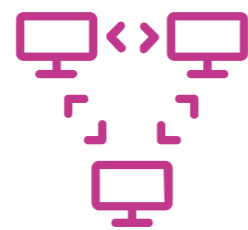

### Loan IQ Transact

Loan IQ Transact eliminates the need for users to manually key loan lifecycle event details into the system by allowing clients to consume transactions/lifecycle events from any upstream system into Loan IQ while Finastra manages the translation and integration to Loan IQ.

### About Loan IQ Nexus

Loan IQ Nexus is Finastra's market integration layer that fosters a connected lending ecosystem by promoting seamless connectivity and interoperability across both internal and external platforms. Nexus is comprised of 4 modules, Loan IQ build, Loan IQ Transact, Loan IQ Maintain and Loan IQ Connect, all of which cover different aspects of the loan lifecycle.

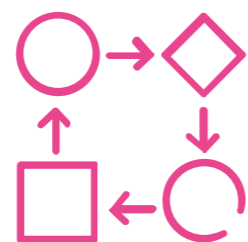

## Solution highlights

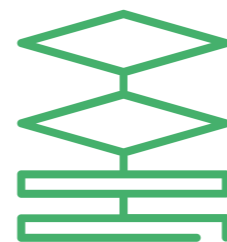

Smart ingestion agnostic of the upstream system

Validates transactions against Loan IQ data

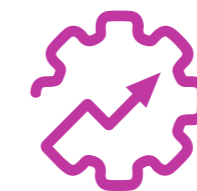

Translates incoming data using client-defined rules

Streamlined workflows and exception-based processing

## Benefits of Loan IQ Transact

### Scalability

Increases efficiency and supports business growth

### Strengthen controls

Improves accuracy and reduces risk by eliminating manual data capture

### Enhanced user experience

Intelligent automation and exception-based processing

### Lower TCO

Finastra owns the build and maintenance of the market-facing APIs
