Digitize and automate the end-to-end lending workflow with Loan IQ Nexus and integrated OCR technology

Step 1: Document capture

Loan documents (applications, financial statements, etc.) Are submitted in physical or digital form

Step 2: Image processing

OCR technology scans and digitizes the text from these documents, converting them into machine-readable format

Step 3: OCR processing

The digitized text is extracted and validated for accuracy. Key information such as applicant details, credit agreement information is identified

Step 4: Data extraction

The extracted data is fed into Loan IQ Build where the data is enriched

Step 5: Data validation

Loan IQ Build validates the data and enables users to enrich it as needed before pushing it into Loan IQ

Step 6: Credit agreement creation

Once validated and enriched via Loan IQ Build, the credit agreement data is uploaded to Loan IQ
