

Trade Innovation Nexus

Driving efficiency, interoperability & innovation in trade finance

What is Trade Innovation Nexus?

Nexus is a next-gen interoperability layer that empowers banks to transform trade finance by simplifying integration, accelerating transaction flows, and enabling seamless connectivity across platforms.

- Global Finance – Best Trade Finance Provider 2025 – Non-bank
- Euromoney Transaction Banking Awards 2025 – The World’s Best Software Provider for Trade Finance
- CNBC and Statista 2025 World’s Top Fintech Companies Award

Challenges associated with Trade & interoperability

Fragmented and legacy systems

Client demand to connect with multi-bank / digital trade platforms

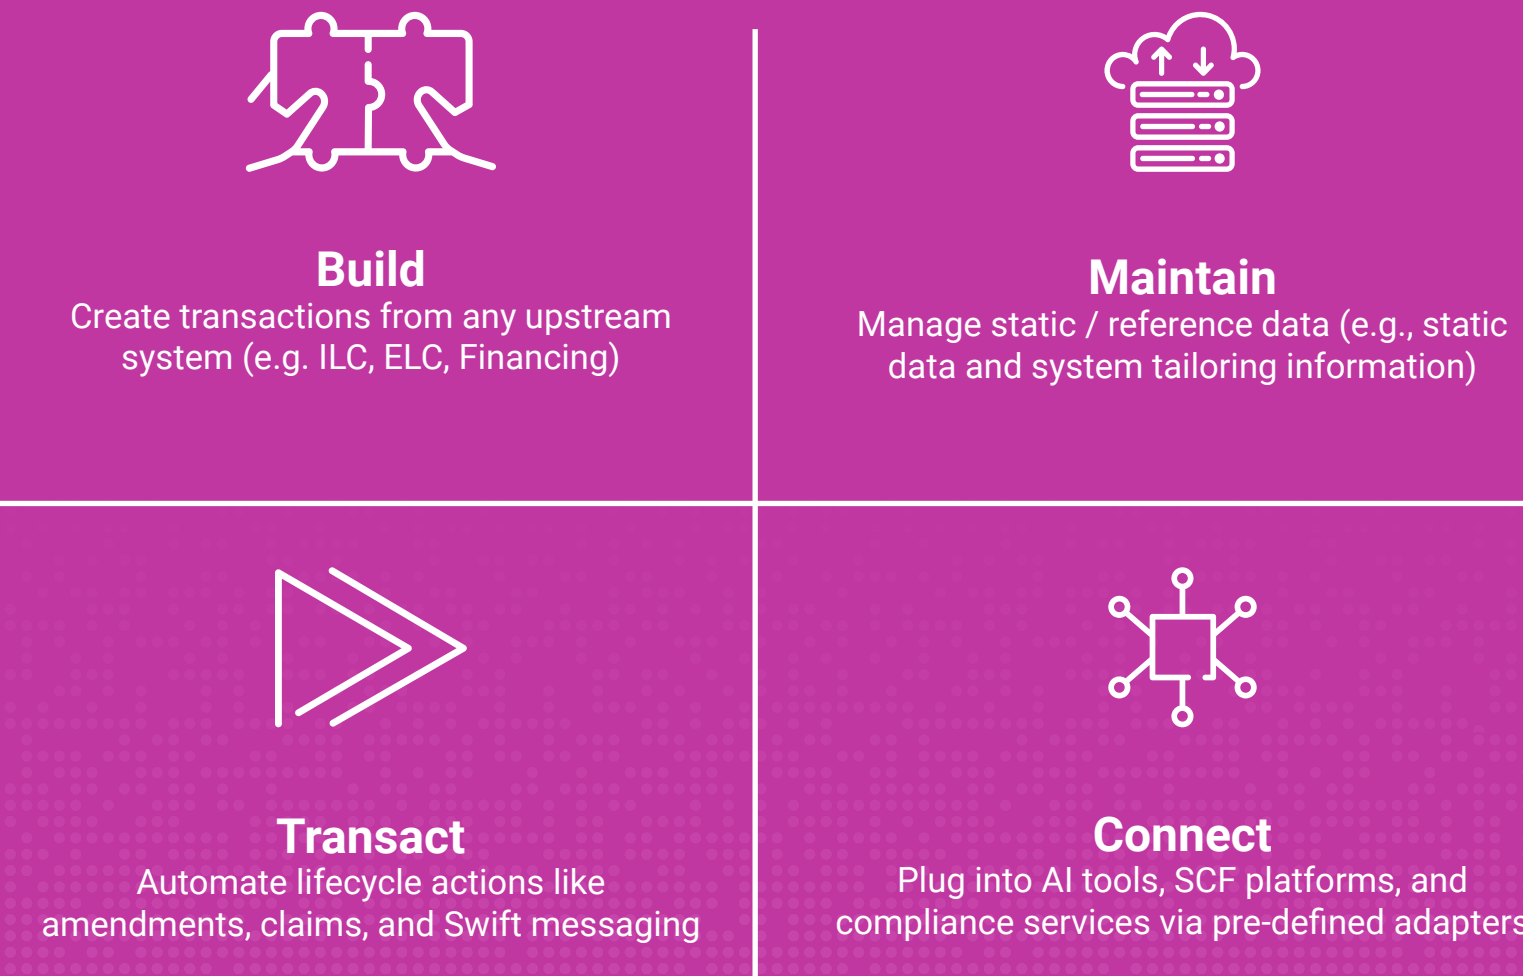

Complex integration requirements

Need for unified integrated solution

Four modules of Nexus

Foundation
Basic subset of REST APIs across Maintain, Transact and Build

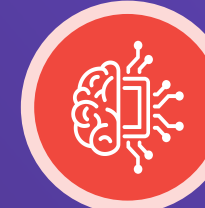

Key capabilities

Unified REST API layer
Simplifies integration across bank systems

Pre-built adapters
Reduce onboarding time and effort

AI-powered compliance & doc checking
Reduces onboarding time and effort

Modular architecture
Future-proofs operations

Built-in compliance & audit tools
Eases regulatory burden

Why Nexus matters

- Reduce time-to-market for new trade products
- Minimize integration costs with legacy systems
- Enhance client experience with faster, smarter trade processing
